Nassos Jewlery Creation

A simple way to find out the size of your Ring.

To ensure your proper choice regarding the size of your ring, the "Nassos Jewelry Creation" Studio recommends you:
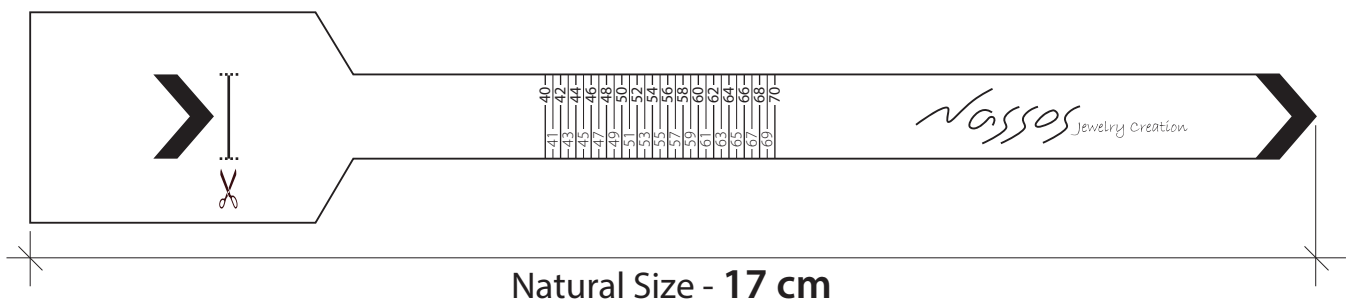

1 Print out and cut the RING SIZER around its shape as well as the groove (only) as indicated on the scissors. So, your personal RING SIZER is ready for you after making sure that you have printed it out in natural size, i.e. 17 centimeters, as shown in the drawing.

2 Place it around any hand and finger on which the ring will be worn, as depicted in the picture.

3 Determine how tight you want it to be... and you just found out your size.

It is always advisable that the ring be slightly loose to avoid any problem with swollen fingers, resulting from fatigue, temperature switches etc.
Also, consider measuring your joints, in case of large perimeter difference.

RING SIZER

Natural Size - **17 cm**

The Ring Sizer to be printed out MUST be 17 cm, so that you will surely select the desired size.
